```
WEEK 11:Q1
String query = " insert into PLAYERS (UID, first_name, last_name, age)"  + "
values (?, ?, ?, ?)";

                        PreparedStatement preparedStmt =
conn.prepareStatement(query);
                        preparedStmt.setInt (1, 1);
                        preparedStmt.setString (2, "Ram");
                        preparedStmt.setString (3, "Gopal");
                        preparedStmt.setInt(4, 26);

                        preparedStmt.execute();

                        preparedStmt.setInt (1, 2);
                        preparedStmt.setString (2, "John");
                        preparedStmt.setString   (3, "Mayer");
                        preparedStmt.setInt(4, 22);

                        preparedStmt.execute();

WEEK 11:Q2
query = " UPDATE Players SET First_name ='Rama',Last_name = 'Gopala', Age = 24
WHERE UID=1;";
stmt.executeUpdate(query);

WEEK 11:Q3
stmt.executeUpdate("DELETE FROM Players WHERE UID = 1;");

WEEK 11:Q4
ResultSet rs = stmt.executeQuery("SELECT * FROM players;");
                        int count=0,total=0;
                        while(rs.next()){
                                count++;
                                total = total +
Integer.parseInt(rs.getString(4));
                        }
                        System.out.println("Average age of players is "
+(total/count));

WEEK 11:Q5
query = "DROP TABLE players;";
 stmt.executeUpdate(query);
```
